

Spring 2020

New for 2020: *Astilbe chinensis* 'Black Pearls'

May 2019

Dear Customer,

We are pleased to introduce our new 2019 / 2020 catalog of bare rooted perennials and summer flowering bulbs for container growing.

Please take a few moments to browse through the catalog and discover the wide range we offer. If you do not want to miss out on certain varieties and numbers please book them with us NOW! You always may add other varieties to your order later on. If the varieties you are looking for aren't listed you always may ask us for possibilities.

This year we are offering over 700 varieties and 33 new introductions, making this one of the most updated perennial catalogs in the market. All varieties are available with colorful picture and tag (see sample picture).

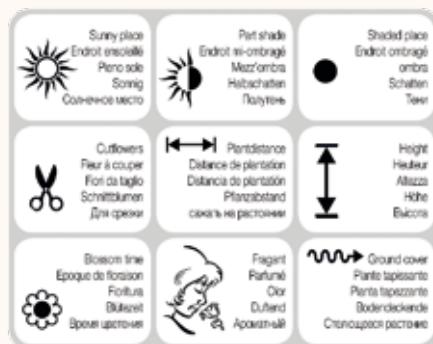

Due to a high level of efficiency and flexibility we are able to keep prices as low as possible. Please have a look at the prices and discover and convince yourself. Stuifbergen Export offers you high quality, not high prices.

We like to take this opportunity to thank you for your orders in the past and hope to be favored again for the upcoming season. Please help us by sending in your order as soon as possible, this enables us to update our orders with the growers much earlier. This especially applies to the new introductions. The index can help you out finding the varieties.

Looking forward doing business with you.

Kind regards,

Henk Stuifbergen

Rear side

Pot labels:

Colourful pot labels are available for all varieties.

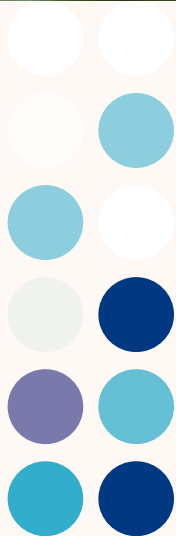

Actual size
2,5"x5,75"

Front cover variety:

Astilbe chinensis 'Black Pearls' p. 26

Rear cover variety:

Eupatorium rugosum 'Snowball' p. 36

spectabilis 'Valentine'	red heart-shaped flowers with dark red arching stems, gray green leaves	2/3	04-07	24"/60	25

A close-up photograph of a vibrant pink Echinacea flower. The flower has numerous long, narrow petals radiating from a dark brown, textured central disk. The petals have a slightly ruffled appearance. The flower is surrounded by green leaves and other similar flowers in the background, which are slightly out of focus. The lighting is bright, suggesting a sunny day.

A close-up photograph of several vibrant red and orange Echinacea flowers with dark brown centers, set against a background of green foliage. The flowers are in various stages of bloom, with some showing the characteristic pointed petals and others showing the developing seed heads. The colors range from deep red to bright orange, with some flowers having a mix of both. The dark brown centers are prominent and textured. The background is filled with green leaves and stems, creating a lush, natural setting.
